

CSE 6224 Software Requirements Engineering Trimester 2510 Context Objects

Project title:

Student Club Management System with Budget and Venue Integration

Tutorial Section: TT5L

Group Name: TT5L_G1

Student Name	Student ID
TAI ZHI XUAN	1211109038
HAZIM ELAMIN MOHAMED ALI MUSA	241UC2400P
IZZA NELLY BINTI MOHD NASIR	1211111583
SAY SI TING	1211108625

1 Introduction

This document identifies context objects for the Student Club Management System with Budget & Venue Integration and highlights the sources from which its requirements will be derived. Clearly documenting these context objects and requirement sources helps clarify the system boundaries, ensure accurate requirements gathering, and streamline interactions with relevant stakeholders and systems during elicitation activities (Tasks 3 and 4).

2 Identified Context Objects

#	Context	Purpose & Interface Typical Data		Real-world
	Object	with SCMS	Exchanged	Reference
1	Student Club Owns membership		→ Club metadata, officer	UPM list of
	(External	roster, finances, and	list, budget line-items,	registered student
		event portfolio. Club	event plans	organisations
	Actor)	officers log in to		(hep.upm.edu.my)
		submit or update:		
		club profile		
		• event		
		proposals		
		• annual		
		budgets.		
2	Club Member /	Authenticates via	→ Student ID, RSVP	Student
	Student	UPM-ID	status, attendance tokens	Organisation
		Single Sign-On;		Directory page
		joins/leaves clubs;		(hep.upm.edu.my)
		RSVPs to events;		
		receives notifications		
		and QR/event passes.		
3	Student Affairs	Regulatory owner of		ВНЕР
	Division	co-curricular	risk-assessment docs,	organisational
		activities. Reviews	audit logs	

	(BHEP)	new-club		pages
		registrations, event		(hep.upm.edu.my)
		approval forms, and		
		post-event reports;		
		audits spending.		
4	Finance Office	Receives approved	⇒ Budget codes, pay-out	Putra Finance
	_	disbursement requests;	vouchers, live balance	system
	Putra Finance	returns real-time		document (bursar.
	System	ledger balances,		upm.edu.my)
		payment status, and		
		GL transaction IDs.		
6	Student Activit	Standard form clubs	→ Activity details, risk	"Borang Permoho
	y Approval	upload; captures risk	items, budget table	nan Kelulusan Ak
	Form (Google	matrix & budget.		tiviti Pelajar"
	Form / PDF)	Triggers BHEP digital		Google-Form link
		routing and		(hep.upm.edu.my)
		e-signature.		
7	Notification	Sends system e-mails	→ Recipient list, subject,	@UPM Mail user
	Service	& push alerts for	payload	manual (<u>IDEC</u>)
	(e-mel@UPM	approvals,		
	+ push)	budget-outcome, or		
		venue clashes. Uses		
		OAuth with UPM		
		mail servers.		

3 Identified Requirements Sources

3.1 Stakeholders

#	Source	Expected Learning	Elicitation
			Method(s)
S1	Club Members	Ease of joining/leaving clubs, clarity of event info,	Survey
		mobile friendliness, accessibility (colour-contrast,	
		font resize).	
S2	Student Club	Internal feature suggestions, system functionality	Brainstorming
	Management	refinement.	Session
	System Project		
	Team		

3.2 Documents

#	Document /	Why it matters to	Access Link
	Source	SCMS	& Citation
D1	Manual Pelaksana an Aktiviti Pelajar (V5)	Governs who may organise events and mandatory committee structure; defines submission timeline (≥ 30 days before event) and risk-assessment contents.	BHEP PDFs – e.g. "Manual Pelaksanaan Aktiviti Pelajar (V5)" (HEP UPM)
D2	Panduan Tuntutan Kewangan Aktivi ti Pelajar	Lays out budget caps, permissible expense categories, receipt requirements, and audit checkpoints.	BHEP PDFs – e.g. "Panduan Tuntutan Ke wangan Aktiviti Pelajar " (HEP UPM)

3.3 Existing Systems

#	Source	Relevance to SCMS	Access Method /
			Citation
X1	ST Putra Facility	Provides authoritative venue	ST Putra
	Booking System	catalogue & clash-detection API.	
X2	PUTRA Presence	Models seamless QR / Bluetooth	PUTRAPresence
	event-attendance	attendance capture integrated with	
	platform	UPM-ID.	
Х3	Cornell CampusGroups	Mature SaaS showcasing combined	CornellUniversity
		club roster, budget request, and	
		RSVP modules.	
X4	Campus Labs Event	Demonstrates offline check-in, bulk	Google Play
	Check-in mobile app	CSV export, and multi-device	
		scanning.	
X5	Eventbrite	Industry standard for public RSVP,	Eventbrite
		automatic reminder e-mails, and	
		ticket QR generation.	

4 Justification

The ten context objects span all data touch-points: human actors, forms, identity, legacy finance, venue, notification, and attendance services. Pairing them with rich requirement sources—policy docs (D-series), live platforms (X-series), and two stakeholders—ensures that the SCMS specification will simultaneously satisfy regulatory compliance, operational feasibility, and user-experience quality. Benchmark systems (X1-X5) provide proven workflows to avoid reinventing the wheel and to set performance baselines.

5 Conclusion

By mapping every external entity and authoritative reference in detail, the project team now holds a single, authoritative boundary definition for the Student Club Management System. These objects and sources will guide Tasks 3 & 4, guaranteeing that no regulatory rule, integration interface, or stakeholder expectation is overlooked during requirements elicitation and analysis.
